Full - Stack Developer

(2023-2025)

SUMMARY

I am a beginner Full-Stack Developer with practical experience in building web applications using the MERN stack (MongoDB, Express.js, React, Node.js). I am skilled in both frontend and backend development, and I enjoy
turning ideas into solutions that can grow. I am eager to use my skills, develop as a software professional, and work on new projects

SKILLS

- Frontend : HTML, CSS, JavaScript, React.js, Bootstrap
- Backend : Node.js, Express.js
- Communication Skills
- Calendar Management
- Time Management

PROJECTS

- **Online E-Commerce Platform**
  - Tech Stack: Node.js, Express.js, React.js MongoDB
  - The goal of this project is to design and develop a fully functional online e-commerce platform that allows users to browse, search, and purchase products securely, while enabling administrators to manage products, users, and orders efficiently.

- **React CRUD Manager**
  - Tech Stack : React.js, JSON Server, Bootstrap
  - A user management system built with React and JSON Server. It supports CRUD operations with features like search, pagination, and soft delete. The UI is designeo with Bootstrap for responsiveness, and the backend uses JSON Server as a mock API for handling data.
